

Highway Towable Running Gear For Vipers!

More economical... more compact... better fuel savings...
less weight than a 185 CFM tow behind.

Offered in either [gas](#) or [diesel](#), the Viper suits all your pneumatic tool needs.

- 80 CFM at 100 PSI rotary screw air compressor
- Powerful enough to operate 90 lb. jack hammers and piercing tools
- Auto engine off and restart smart technology for increased fuel savings
- Auto variable throttle control based upon air demand to minimize fuel consumption and noise
- Optional running gear featuring independent torsion axle suspension and heavy duty construction
- Optional 50' hose reel with 3/4" hose

Why purchase a big, bulky, fuel intensive and expensive 185 tow-behind, when a Vanair Viper Compressor can meet your needs at a lower cost!
